

# This product is printed on **Stone Paper**®

## What is Stone Paper?

Stone Paper® is a new alternative to pulp and pure synthetic paper, made using 80% mineral content.

Not a single tree or drop of water are used to manufacture Stone Paper products. This process avoids the air and water pollution associated with pulp paper production, while also using 85% less energy that results in up to 67% smaller front-end carbon footprint.

## Why use Stone Paper?

**1 TON  
Stone Paper® Products**

→ **Saves** →

**20  
Trees**

**16000  
Gallon Water**
