

PRINTING ON & DESIGNING FOR SEEDED PAPER

DO'S

- Have a design with light ink coverage. (less than 30%)
- Maximize the growth of seed paper by limiting your design. It will not grow with heavy coverage.
- Submit your artwork for guidance when in doubt.
- Remember that this product is a novelty! Not a method of growing mass amounts of wildflowers.

DO NOT'S

- Have a design with large solid areas, big background images or borders.
- Ask for PMS colours to be matched.
- Have unrealistic expectations about the imprint. Remember that we are printing on seed paper!

HELPFUL TIPS

Design like this...

...not like this.
